

PATIENT NAME : SUKLA KARMAKAR
AGE / SEX : 50 Years / FEMALE
REFERRED BY : Dr. D. NASKAR
SAMPLE FOR : OSS

RECEIVE DATE : 30/10/2025
PANEL : JAGANATH
LAB NO. : 67097/PATH/30/10/20
REPORT DATE : 30/10/2025

REPORT ON EXAMINATION OF HAEMATOLOGY

Test Name	Result	Unit	Reference Range
CBC (COMPLETE BLOOD COUNT)			
HB%	10.5	gm/dl	MALE : 13.5 - 18.0 gm / dl FEMALE : 11.5 - 16.4 gm / dl
TOTAL COUNT			
RBC COUNT	3.5	10 ⁶ /uL	3.00 - 5.50
WBC COUNT	8,400	/cmm	4000 - 11,000
DIFFERENTIAL COUNT			
NEUTROPHIL	68	%	50 - 70
LYMPHOCYTE	24	%	20 - 40
MONOCYTE	02	%	2 - 10
EOSINOPHIL	06	%	1 - 6
BASOPHIL	00	%	0 - 1
ESR (erythrocyte sedimentation rate)	40	mm/hr	0 - 15
PCV	31	%	Male : 42 - 52 % Female : 37 - 48 %
MCV	88.57	cu.micron	86 - 98 micron
MCH	30	pico-grams	28 - 33
MCHC	33.87	%	32 - 36
PLATELET COUNT	2.45	/cu.mm.	1.5- 4.5

REPORT DATE : 30/10/2025

WIDAL TEST

	1 : 20	1 : 40	1 : 80	1 : 160	1 : 320	1 : 640
TH	+	+	+	-	-	-
TO	+	+	+	-	-	-
P.A.H	+	+	-	-	-	-
P.B.H	+	+	-	-	-	-

Notes :

Agglutination (+) / Non Agglutination (-)

Agglutination titre of 1:80 or more is significant. An increase in titre, 4 to 5 days after the first test is suggestive of active Salmonella infection.
